

Dimpled rings - Method 1

Fig 1

For this sample work 9 ds, a very small picot, 4 ds, (Fig 1)

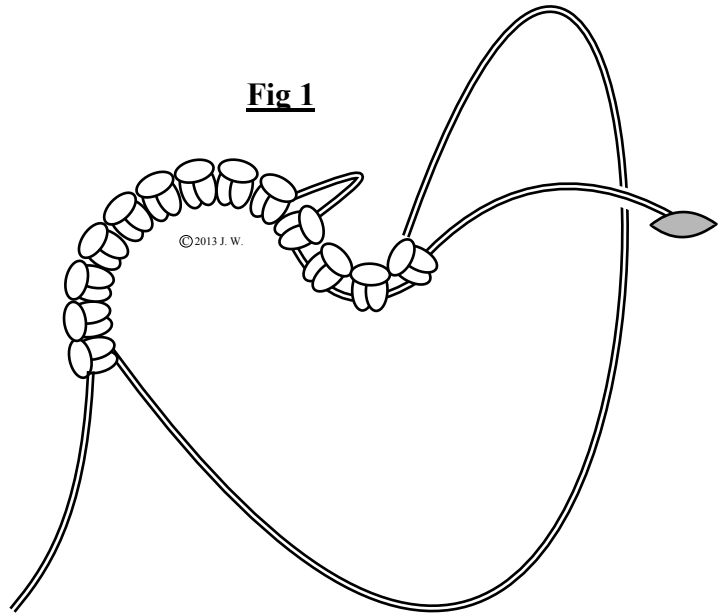

Fig 2

Join to the very small picot, then work 9 ds (Fig 2)

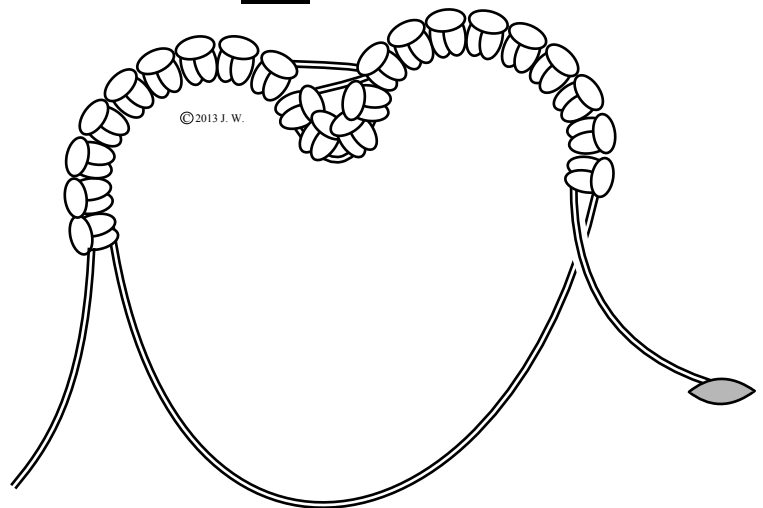

Fig 3

Close the ring by pulling the 'core' (shuttle) thread firmly (Fig 3)

Note: you need to pull firmly when closing a dimpled ring because the 'core'(shuttle) thread has to go down into the dimple and up again.
